

# **Media Release**

## **Interactive city map now online**

Release Date: 02 September 2013

An interactive map tracking the progress within Christchurch's central city is now live at [progressmap.ccd.govt.nz](http://progressmap.ccd.govt.nz)

The map gives progressive information about the Anchor Projects and will continue to be updated as each project gets underway.

The map also notes the location and information about some of the most prominent private constructions in the central city.

It is hoped the map will be shared both nationally and internationally through social media, to keep people outside of Greater Christchurch informed of the progress that is underway.
