Online map tracks CBD cordon reduction

Release Date: 14 December 2011

CERA has launched an online map showing a time lapse of CBD cordon reductions from 22 February 2011 through to the present day.

The cordon reduction map, which can be viewed at <http://cera.govt.nz/maps/cordon-reduction>, shows the CBD cordon's outer perimeter within the CBD Four Avenues from when it measured 3.9 square kilometres in February, to now measuring 0.7 square kilometres.

The map is being launched at a time when CERA operations are focusing work in the eastern and south-east areas of the cordon in anticipation of further reductions close to Christmas and in the New Year.

It will continue to be updated as cordon reductions are announced.
