Domestic violence perpetrators will no longer be able to use the excuse that they did not understand the law, with the NSW government removing complex legal jargon from new apprehended domestic violence orders.

It comes after research from the NSW Bureau of Crime Statistics and Research showed one in five apprehended domestic violence orders are breached, equating to almost 7700 breaches a year.

## WOOP - a simplified version of MCII

### ◆ What is your **WISH**?

What is your most important wish or concern? Pick a challenging wish that you can reasonably fulfil within the next four weeks.

### ◆ What is the best **OUTCOME**?

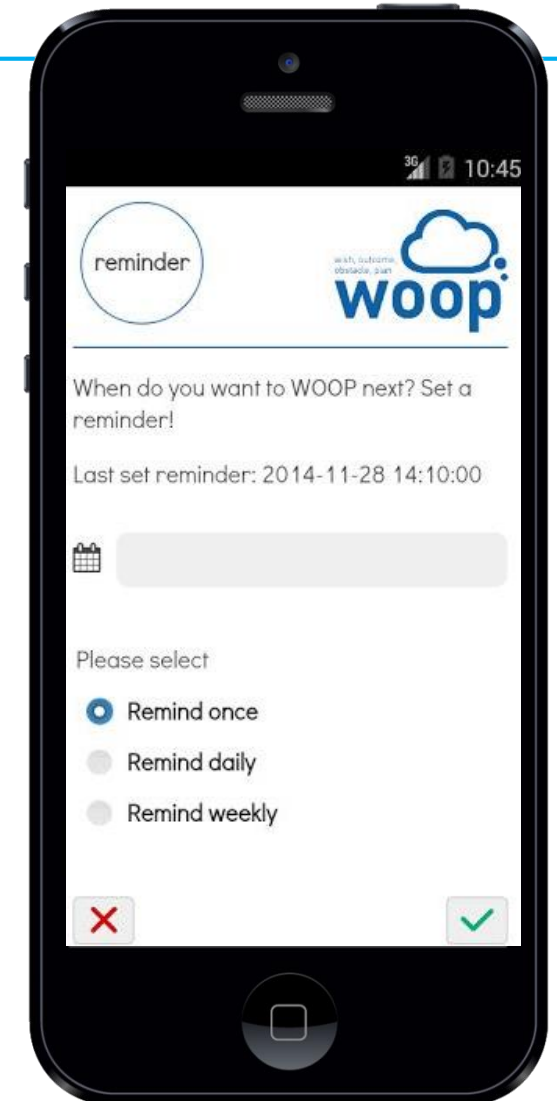

If your wish is fulfilled, where would that leave you? What would be the best, most positive outcome? How would it make you feel? Identify your best outcome and take a moment to imagine it as fully as you can.

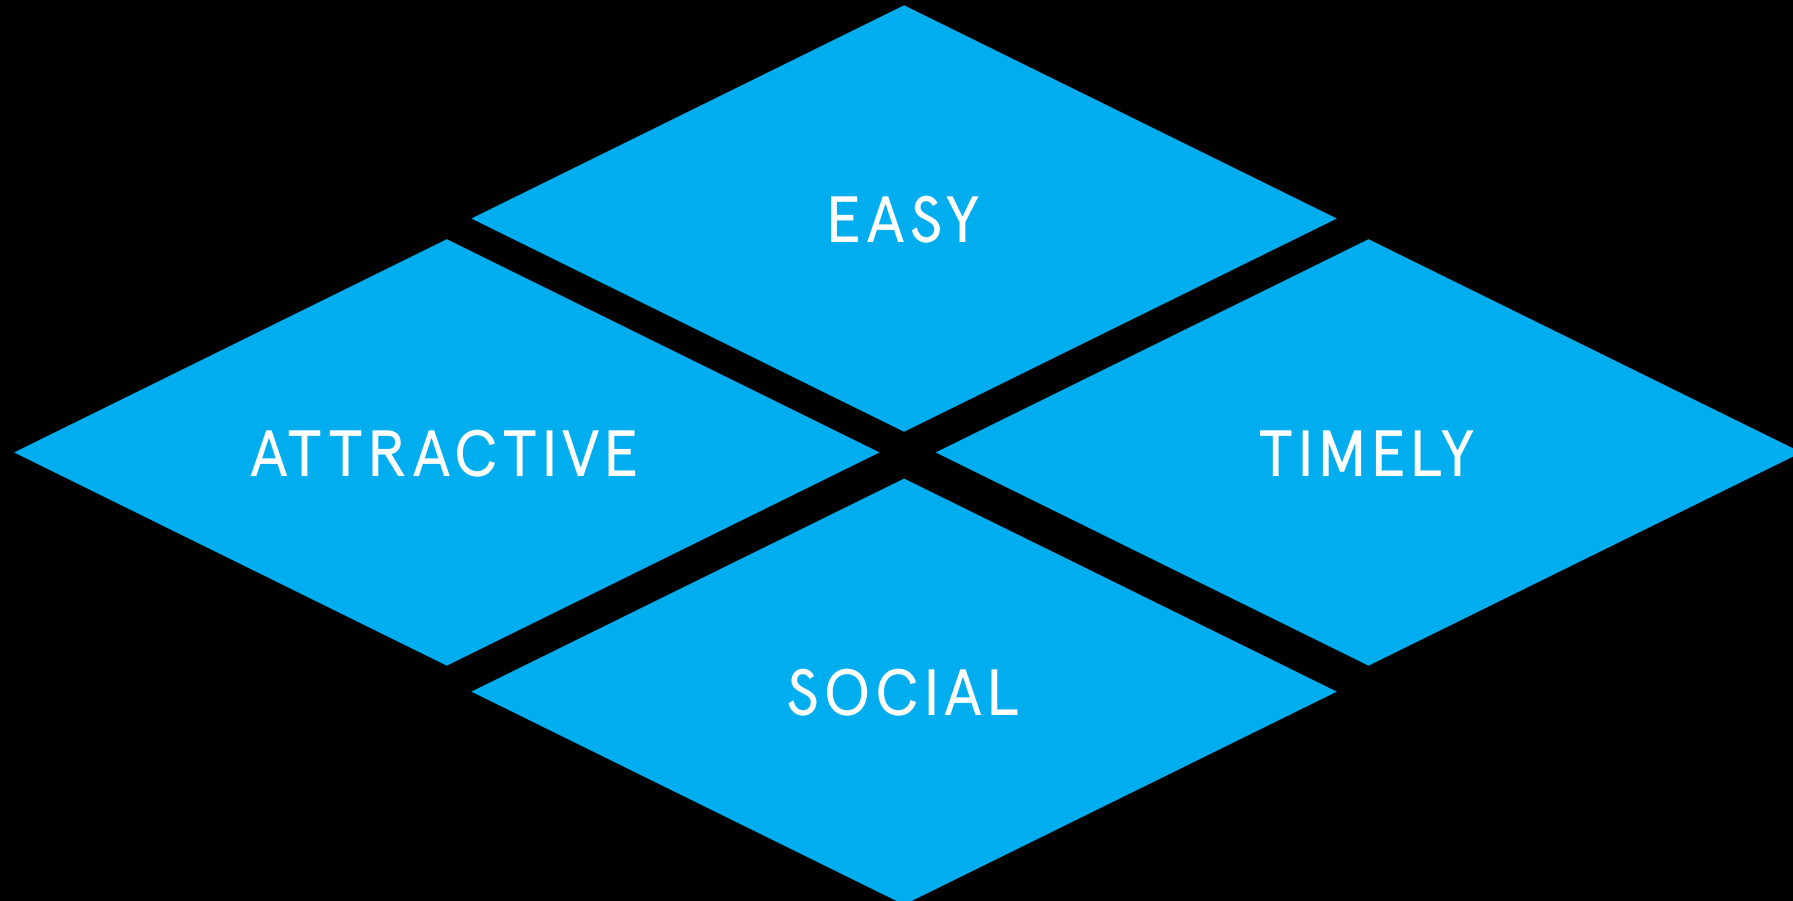

### ◆ What is your main inner **OBSTACLE**?

What is it *within* you that holds you back from fulfilling your wish? It might be an emotion, an irrational belief, or a bad habit. Identify your main inner obstacle and imagine it fully for a moment.

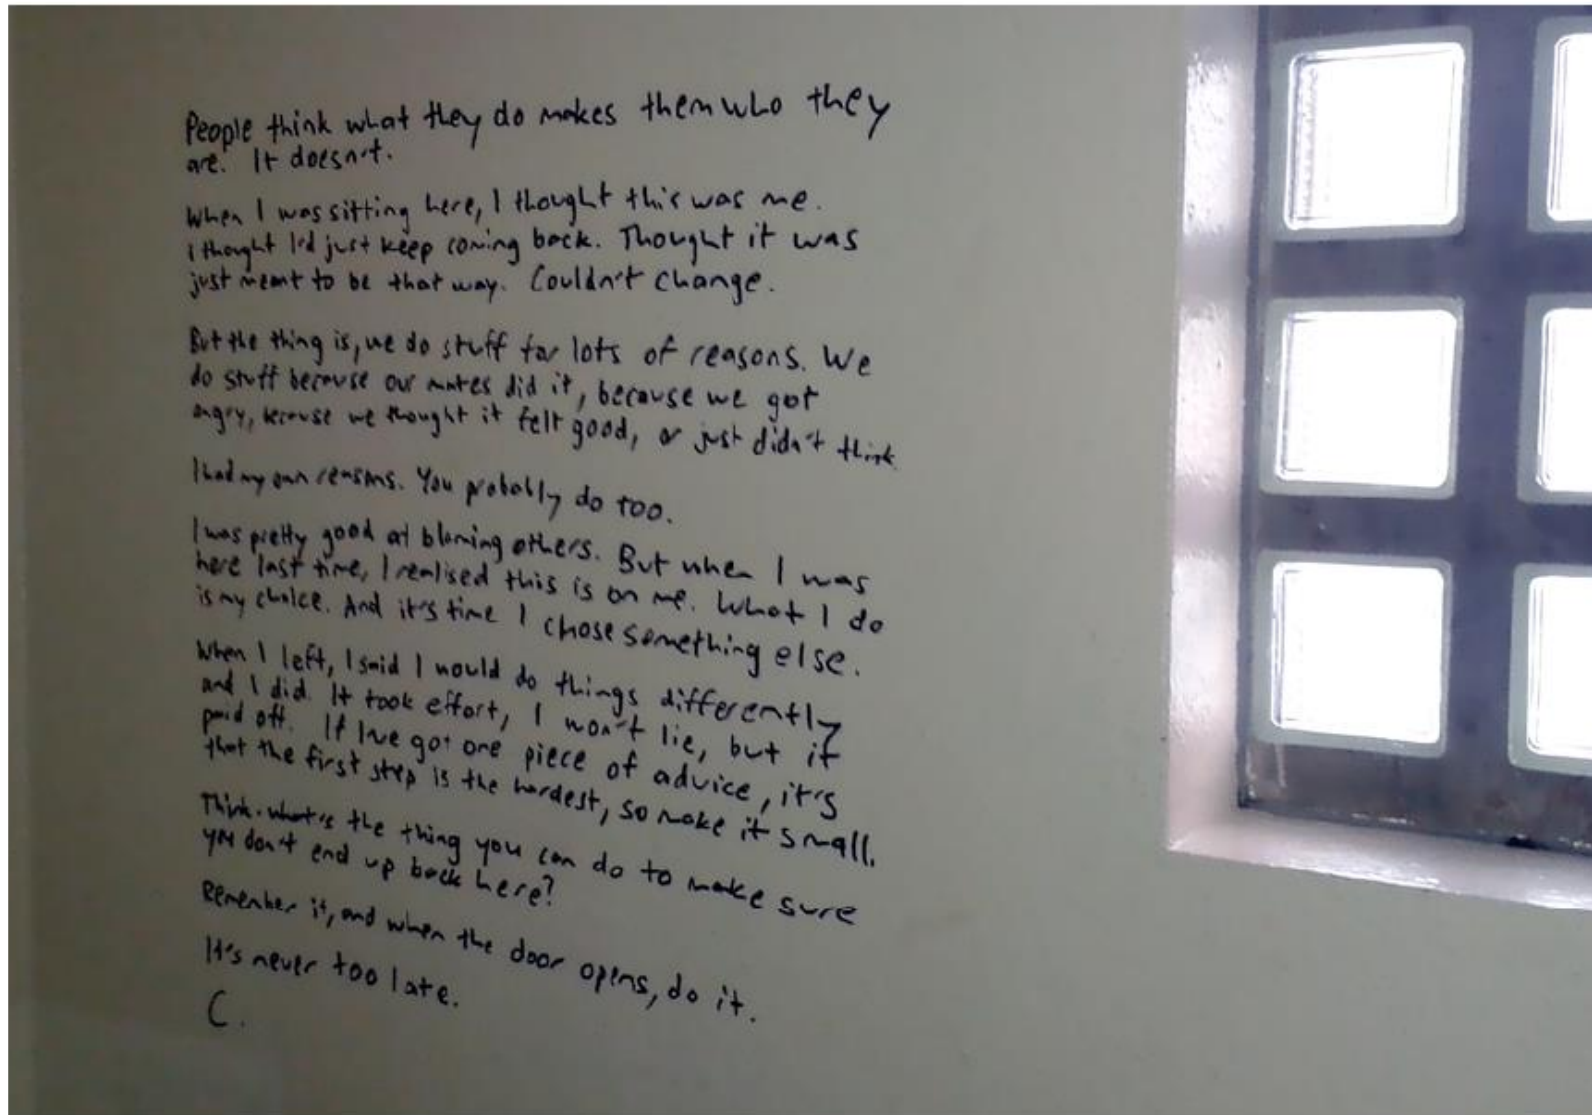

### ◆ Make a **PLAN**.

What can you do to overcome your obstacle? Identify one action you can take or one thought you can think to overcome your obstacle. Make the following plan for yourself: *"If... (obstacle), then I will ... (action or thought)."*

## Using a key moment to influence

## Policy aim: recruiting a more diverse police force

---

**“We will transform the relationship between the police and the public**

We have taken action to boost public confidence and trust in the police and now want to go even further.

We will improve the diversity of police recruitment – especially of black and ethnic minority officers.”

## Treatment message

---

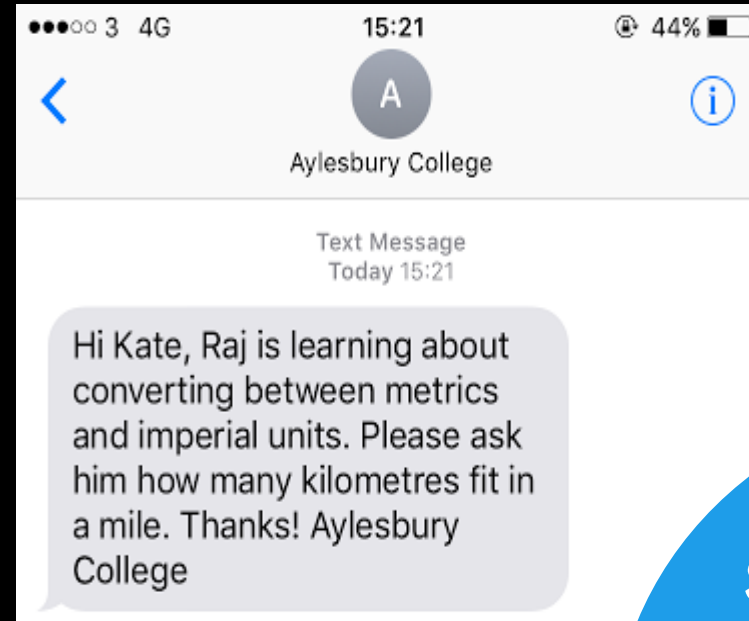

- ◆ The 'affirmation boost':

*"Before you start the test, I'd like you to take some time to think about why you want to be a police constable. For example, what is it about being a police constable that means the most to you and your community?"*

## Reducing recidivism by recent offenders

---

- ◆ TARGET: reduce reoffending by first time offenders committing common assault through diversion process
- ◆ (Assumption – common assault is a high predictor of reoffending, and diversion is effective)
- ◆ What are the specific behaviours you want to encourage/ discourage?
- ◆ Use the EAST Framework to generate potential intervention
- ◆ How would you know if the intervention is effective?
