					RECTRICTED
Focus	Sub-Focus Area	Last Week	This Week	Agency Responsible	Agency Comment on Status
	Cook Islands quarantine-free travel (two way)	•	•	MFAT	 On 22 March, Cabinet instructed officials to continue to work towards two-way quarantine-free travel, to support the health-health work programme March to May, and report back to Cabinet in May on the feasibility of commencing two-way quarantine-free travel before the end of the second quarter of 2021. The switch from 'amber' to 'green' could occur towards the end of the health-health work programme (which will run March to May 2021) when the extent of progress can be assessed and further decisions have been taken on the timeline for the vaccine roll-out in the Cook Islands. Two-way QFT has been a central topic during the visit of Prime Minister Brown this week, \$7(b)(ii) The New Zealand Ministry of Health is working at pace to support the Cook Islands' health sector's readiness for the possible opening of QFT in May 2021. While vaccinations are not considered a prerequisite for QFT, officials are also working to support vaccine rollout to the Cook Islands which will provide an additional layer of protection.
	Niue quarantine-free travel (one-way)			MFAT	• COMPLETED: One-way OFT from Niue to New Zealand commenced on Friday 19 March 2021, with the first flight taking place on 24 March, carrying 43 passengers.
Quarantine Free Travel	Niue quarantine-free travel (two-way)	•	•	MFAT	 s7(b)(ii) The timing of the switch from 'amber' to 'green' will be able to be better assessed following a technical visit to Niue by officials and further decisions have been taken on the timeline for the vaccine roll-out in Niue.
	Trans-Tasman quarantine-free travel	S	Ċ	MFAT	 On 22 March, Cabinet agreed in principle that two-way quarantine-free travel (QFT) with Australia could commence in April 2021. Commencement will be subject to the completion of necessary readiness work (including the finalisation of the response framework, engagement with airlines and airports, ensuring regulatory mechanisms are in place, Australia's lifting of its outward travel ban, and the resolution of technical issues such as transit passengers, MIQ fees, and contact-tracing of travellers from Australia) as well as a health assessment from the Director-General of Health. Cabinet has directed officials to report back on readiness for commencement on 6 April. To this end, on 29 March we provided you with a draft Cabinet Paper that you may choose to take to Cabinet on 6 April. The paper seeks Cabinet's approval that, on the basis of work now completed on the eight conditions listed in the bullet point above, and subject to final health advice from the Director-General of Health, QFT from Australia to New Zealand may commence from 19 April 2021. It also seeks a Cabinet decision on whether, and in what circumstances, pre-departure testing will be required for passengers travelling from Australia to New Zealand. The switch from 'amber' to 'green' can occur after a) Cabinet considers officials' report on the readiness work-streams listed above on 6 April, and b) the Director-General of Health provides an assessment that it is safe to commence two-way QFT with Australia (expected to occur shortly before commencement).
					RESTRICTED

COVID-19 Insights

2. COVID-19 Insights

2.1 Insights of Note

2.1.1 Vaccination Willingness by Nation

The chart below shows the proportion of the population that would choose to get a COVID-19 vaccine if it was available to them, by nation.¹ This percentage represents the share of survey respondents who agree with the statement: "If a COVID-19 vaccine was made available to me this week, I would definitely get it." Of the nations surveyed, the nation with the highest proportion of the population that were willing to get a COVID-19 vaccine was Denmark at 68%, followed by the United Kingdom at 66%, and Sweden at 61.8%. By comparison, a February Horizon Research survey of New Zealanders indicates that approximately 71% of New Zealanders are willing to have a COVID-19 vaccine.² Updated survey results are expected soon.

2.1.2 Fake COVID-19 Vaccination Certificates

Monitoring of the dark web by a private cybersecurity firm has identified discussion by New Zealanders of getting fake COVID-19 vaccine passports, although to date there is no evidence of any being obtained.³ Internationally, advertisements for fake COVID-19 vaccination documentation on the dark web have increased by approximately 300% since January (currently there are over 1,200).⁴ For

¹ Our World in Data. As at 31 March. https://ourworldindata.org/covid-vaccinations#country-by-country-data-on-covid-19-vaccinations. (Accessed 1 April 2021). Presenting data from: Imperial College London YouGov Covid 19 Behaviour Tracker Data Hub – Last updated 30 March 2021. Respondents were presented with a 1 to 5 scale, ranging from "strongly agree" (1) to "strongly disagree" (5). Responses of 1 or 2 were considered to be in agreement with the statement.

⁴ Cybercriminals are increasingly selling forged vaccination certificates on the darknet. 24 Mar 21. https://fortune.com/2021/03/23/covid-vaccinecards-fake-vaccination-certificates-darknet-cyber-criminals-selling/. (Accessed 1 Apr 21).

RESTRICTED

example, fake vaccination cards from the Centers for Disease Control and Prevention (CDC) are available for purchase.⁵ There are various private sector vaccination certificate recording schemes in development (otherwise known as a travel health passes). However, due to the range of schemes and varying processes this may add further confusion to determining the reliability of a vaccine certificate. The International Air Transport Association (IATA) Travel Pass app is one example of a travel health pass, which Air New Zealand have indicated they will trial in April this year.⁶ The New Zealand government, as part of its Travel Health Pass work programme (the Programme), is working together with a group of government agencies, to develop verifiable vaccine certification to facilitate international travel. The Programme will consider the international context including possible existing solutions like the IATA Travel Pass. A detailed overview of the Programme is intended to be provided to you in the week of 5 April 2021.⁷

2.1.3 Vaccination Progress by Nation

The chart below shows the proportion of the population that have received at least one dose of COVID-19 vaccine, by nation.⁸ As the data does not distinguish between vaccines that require more than one dose, this may not represent the share of the population that are fully vaccinated. The chart shows the top 10 nations, as well as Australia and New Zealand.

3. Ministry of Health Weekly Report

3.1 Items to Note/Updates

3.1.1 Publication of Fortnightly COVID-19 Disease Indicator Summary Reports

The Ministry is planning to release the fortnightly COVID-19 disease indicator summary report (indicator report) on the Ministry's website for the period from 26 February 2021 to 11 March 2021.

These reports were developed based on the recommendations in the Rapid Audit of Contact Tracing for COVID-19 in New Zealand and provide an end-to-end view of the public health response to COVID-19 for cases and close contacts.

Key points of interest for this report are:

- This reporting period involves four additional community cases linked to the February South Auckland community outbreak (Cases L, M, N and O) and the March Auckland aircrew case, and their respective associated close contacts. Case O was already isolating and as a result has no associated close contacts.
- The indicators listed below are low due to the delayed identification of cases following symptom onset.
 - o S001 Time from exposure to contact isolation / quarantine
 - S002 Time from case first symptom to contact isolation / quarantine
 - C001 Time from first symptom to test sample taken for positive cases.
- While S001, S002, C001 are below target, S003 Time from test sample taken to close contact isolation / quarantine shows that once a case has been identified the system performance is above target (80 percent by 48–72 hours) at 81 percent for this reporting period.
- The public health indicators P002 Time from case notification to isolation / quarantine of contact and P004 Proportion of contacts traced in 48 hours are very close to target (80 percent by 24–48 hours) at 79 percent. The context for this is that during this reporting period, the close contact category was applied to contacts at specific locations of interest which required individuals (who would normally have been classified as casual plus contacts) to self-identify. When contacts self-identify and call Healthline, they are provided the appropriate advice on testing and isolation requirements. However, the time of these inbound Healthline calls are not recorded in the National Contact Tracing Solution (NCTS), and so are not able to be recorded against this metric. A further outbound call is made from the NITC to these contacts to ensure they understand and will comply with the advice given; this call being recorded against the metric. Therefore, in this instance performance against P002 and P004 was in reality far better as contacts commenced isolating earlier upon receiving that initial advice.
- **Q**.
 - **P003** Time from close contact identification to isolated / quarantine demonstrates that once a close contact has been identified in the NCTS the system performance is above target, at 93 percent for this reporting period.
 - There were 42 cases in MIQF during this period.

Next steps

The report will be released on the Ministry of Health's website in the week of 29 March 2021.

3.2 Policy/Programme Updates

3.2.1 Phase 1 Vaccine Roll-out

As at 30 March 2021, 66,296 vaccinations have been delivered, including 14,113 people who are fully vaccinated. 10 percent are Māori, 8 percent are Pacific, and 19 percent are Asian.

On 30 March 2021, 45 sites were live delivering vaccinations.

Technology

Work is continuing on ensuring the national booking system and other supporting technology is ready for the Phase 2 roll-out.

This week, features went live to increase digitisation of Centre for Adverse Reaction Management (CARM) reporting and workflow for adverse reactions. This will support improved workflow to enable volume as vaccinations scale.

Workforce

1,603 vaccinators have completed vaccine training and 646 vaccinators have been active in the programme so far.

The demand for vaccinators continues to grow as roll-out progresses. Several initiatives are underway to increase the size of this workforce, including:

- Reviewing how the workforce 'surge' database can be better utilised to better 'screen' those on the database and enable DHBs to more readily locate suitable candidates
- Investigating further opportunities to generate new interest from potential vaccinators. The Ministry is actively working with other organisations where staff are already able to vaccinate (such as ambulance services) and to also consider non-registered and non-regulated workforces (such as the New Zealand Defence Force).

Distribution and inventory management

Co-design has commenced with DHBs on an updated distribution network design to allow the network to scale using a hub and spoke model, increasing flexibility and local responsiveness. This design is expected to be finalised through the next two-week design sprint.

Equity

The Ministry of Health has identified an initial 54 Māori health providers for the \$11 million provider readiness and support funding. The Ministry of Health, with Tumu Whakarae, will confirm the providers and progress to rollout the funding by early April 2021, starting with Māori health providers in the Counties Manukau DHB region.

For Maori communications funding, progress has been made on allocating the \$2 million funding with a two-step process, funding to the Iwi Comms Collective and a grant funding process for all other Maori organisations and providers.

The Ministry has confirmed and allocated the \$4 million to Pacific health providers for provider readiness and support. Contracts have been sent out to providers.

This week \$2 million funding was approved for a disability communications campaign. Co-design will be targeted to specific cohorts within the disability sector to drive specific awareness and comfort campaigns, addressing equity or information and distribution so that all people, regardless of disability, will be well informed and prepared for their vaccination.

Next steps

We will provide you with a further update in the next Weekly Report.

3.3 Technical Advisory Group: Update

The COVID-19 Vaccine Technical Advisory Group (CVTAG) met on 23 March 2021 to discuss the recommendations for vaccinating children, the revised VAANZ cohort study, and advice to inform guidance on symptoms and routine testing of vaccinated border workers 48 hours' post-vaccination.

As the action from this meeting, the Ministry of Health will draft a guidance document for symptoms and testing 48 hours' post-vaccination and provide it to CVTAG for its review.

CVTAG will next meet on 6 April 2021 and TAG will next meet on 16 April 2021.

3.4 Recent Communications Issues and Activities

4. Managed Isolation and Quarantine Weekly Report

MINISTRY OF BUSINESS, INNOVATION & EMPLOYMENT

4.1 Top Items to Note

- 4.1.1 Update on Grand Mercure
 - In response to the COVID-19 positive returnee being allowed on the bus to a managed isolation walk, MIQ is undertaking an investigation into what occurred and if any changes should be made. The indications from this review are that the returnee should not have been on the bus and that adherence to infection prevention and control (IP&C) measures was inconsistent on the bus to the managed walk.
 - Some operational changes have already been made including the introduction of two-door busses, to allow better spacing as returnees get on and off the bus, dedicated seating on the bus to and from the walk, as well as a more formal standardised verbal brief for each journey highlighting the need to adhere to IP&C measures. In addition, hard-plastic screens are now in place behind the driver's seat to separate the drivers and returnees, and drivers are wearing N95 masks.
 - This rapid investigation will feed into the joint MOH/MIQ incident review of what has occurred at the Grand Mercure MIF. Further changes are likely as a result of the rapid investigation and the wider incident review.
 - The TAG were provided with an update on the initial findings from the preliminary on-site ventilation assessment of the rooms of interest at this facility .
 - The assessment was undertaken by ^{\$9(2)(b)(ii)} an independent ventilation specialist, on behalf of MBIE, on Monday 29 Mar 2021.
 - Early indications are that there are variable air flows and pressure differences between these rooms. The TAG noted that aspects of the ventilation design and operation merit further investigation to confirm that performance is consistent with the intended design. The TAG noted that the hotel is scheduled for a more detailed onsite assessment on 6 Apr 2021, with testing expected to be completed within two weeks of this.
 - The TAG will reconvene on 13 Apr 2021 to consider the early findings of the more detailed onsite assessment.

4.1.2 New managed isolation walk (MIW) site in Auckland

- In Oct 2020, the Ministry of Housing and Urban Development (HUD) agreed that a portion of their land at the Unitec site in Mt Albert could be used for managed isolation walks for four of our facilities.
- Q
- HUD have informed us that they are planning some infrastructure works to start in May 2021, and one set of them is likely to directly affect the land that is currently being used for the managed walks. As such, we will need to vacate this site.
- HUD has offered the use of the upper rugby fields at the same site to accommodate MIW. The Auckland RIQ has assessed the site as suitable. As part of this work, there is a meeting next week with the local iwi as well as with Unitec to ensure they are fully briefed and understand the IP&C and security requirements that are in place to ensure the safety of the returnees, staff and the community.

- 4.1.3 Auckland International Airport
 - MIQ, AIA and border agency stakeholders have an in-principle agreement on passenger processing at Terminal B for onward travel to Auckland, Rotorua and Hamilton MIQFs.
 - The parties are also in discussions regarding the domestic charter transfer process at Terminal B for onward travel to Wellington and Christchurch MIQFs.
 - Testing of both processes will continue ahead of the beginning of Quarantine Free Travel.

4.1.4 Vaccinations update

- The vaccination of the MIQ workforce continues to progress as expected.
- System and process limitations are still preventing a large number of vaccination records being linked to an employer, so it is challenging to understand where uptake is low across the system. We are working directly with employers to confirm unvaccinated employees, and employers are working through their health and safety risk assessments.
- The second round of doses for the MIQ workforce continues, as does the first round of doses for workforce close contacts.
- The information pack for employers to provide guidance on managing this with their staff has been released. Additional communications to support the Employment Relations work is under final review.

4.2 Operational update

4.2.1 Capacity update

- A total of 29,877 rooms have been released for Apr-Jul 2021 over the past 8 weeks (since late Jan 2021).
- 38,448 returnees are coming home across the period of Apr-Jul 2021.
- Returnees from over 180 countries successfully secured a voucher to travel during this period.
- A further top-up of 1,996 rooms across 28 Mar-30 Apr 2021 was released on 23 Mar 2021.
 - As at 30 Mar 2021, there were 334 rooms remaining for the period 31 Mar-30 Apr 2021.
 - As at 30 Mar 2021, there were 2,365 rooms available for the period Apr-Jul 2021
- Last week we received a record low number of complaints with regards to the MIAS system due to the voucher releases.

4.2.2 MIQ Facilities Ventilation Review

- Work is underway to assess the ventilation system operations across the portfolio of hotels.
 - An onsite inspection programme began on 22 Feb 2021. It is estimated that the programme will take 2-3 months to complete, subject to accessibility to hotels, availability of assessors, etc.
- The review is being carried out in two stages:

Stage 1: Desktop assessments

• MoH-led initiative to assess hotel ventilation systems based on system design specifications. The preliminary assessments are largely complete with a range of recommendations

RESTRICTED

RESTRICTED

identified and being worked through (including some immediate mitigations implemented). One key recommendation was the need to undertake onsite assessments in order to gain a more accurate view of ventilation system operations.

Stage 2: Onsite assessments

- MBIE-led initiative to assess ventilation systems within existing MIQ accommodation to understand the operation of the existing systems and the risks associated with them.
- The focus for onsite testing is the remaining 31 of 32 sites (32nd site is the Pullman the ventilation review is complete and remediation work is underway).
- 11 sites have requested extensions to the planned 10-day turnaround to provide provisional results back to MBIE.
- 2 of 31 sites have provided provisional results to MBIE for internal analysis (M-Social, Auckland and Novotel Christchurch Airport).
- A small number of hotels have indicated that they are having issues engaging an Independent Qualified Person (IQP) to complete the onsite testing.
- As assessments are received an analysis of results will be undertaken and then reviewed by a Technical Advisory Group.

4.3 Policy Update

Potential issues with the charging of MIQ fees for some Australians

We have identified some potential technical issues relating to the application of the MIQ fees provisions for certain groups of Australians entering New Zealand.

These issues relate to:

- Australians who travelled to New Zealand as critical workers or critical health workers, but who are granted New Zealand residence class visas on arrival.
- Australians who enter New Zealand as partners of New Zealand citizens (a border exception introduced after the fees regime came into force) and who only ever hold a residence class visa.

The concern is that, as residence class visa holders, unless they left New Zealand after 11 Aug 2020 or are staying for less than 90 days (or 180 days from 1 Jun 2021), they are not specified in the MIQ Charges Regulations as liable for fees. The default setting in the charges provisions is that you are only liable for fees if you are part of a specified class of people.

s9<mark>(2)(h)</mark>

We are exploring potential remedial options with Crown Law. These include:

We will provide you with advice and recommendations on this issue as part of a package of advice on the fees regime later this month.

4.4 Large Group Arrivals Update

Summary of approved group arrivals as at 29 Mar 2021

Group	Date of Arrival	Pax Numbers	Comments
Refugees quota re-start - Cohort 1B	16 - 28 Mar 2021	44	The total pax who will arrive for Cohort 1B is 44 pax arriving over 16–28 Mar 2021. 33 pax arrived 16 Mar 2021, as planned. 2 pax arrived 25 Mar 2021. The final 9 pax from Ecuador arrived 28 Mar 2021. To date there have been no issues with refugees while in MI – all are super happy to finally be in NZ.
Olympic Athletes	29 Mar - 25 Apr 2021	19	Returnees from Tokyo Olympic qualifying events. Various return dates. Original numbers reduced from 41 due to cancelled events, vouchers secured via MIAS and athlete withdrawal.
Refugees quota re-start - Cohort 2	5 - 9 Apr 2021	69	RQP have advised the following schedule: 23 pax on 6 Apr 2021, 20 pax on 10 Apr 2021, 12 pax on 16 Apr 2021, 8 pax on 11 May 2021, and 6 pax on 12 May 2021. From Malaysia, Thailand and Ecuador.
Rocket Lab	Early May 2021	8	Arrival dates TBC. Request has reduced from 14 vouchers to 8 as many have secured vouchers via MIAS. They have also requested 3 short stays for charter flight crew.
Refugees quota re-start - Cohort 3	24 - 28 May 2021	70	Arrival schedule and Cohort details TBC – likely to slip right into late May/June. PGA are working with RQP on EOI for FY 21/22

4.5 Upcoming Communications Issues and Activities

As at 31 Mar 2021

Date	Activity	Lead Agency	Comms Material	Ministerial Involvement Y/N

4.6 Fees

4.6.1 Invoicing

- The table below shows the number of invoices issued up to 30 Mar 2021. These relate to people who arrived in managed isolation up to 14 Mar 2021, noting that invoices are issued after the two-week stay.
- Not all of those identified as 'potentially liable' will receive an invoice.
- The 'Invoices to be confirmed' column includes temporary visa holders and others who
 require further contact to confirm their liability. It also includes people who are in contact
 with us about waivers. These people will not be invoiced until their enquiry or application
 has been resolved.
- Invoices are due 90 days from the date on the invoice and are sent 'per room'.

	People potentially liable for charges	needing	Waivers approved	Invoices to be confirmed	Invoices sent	Paid #	Paid (\$NZD)	Unpaid 0 — 90 days	Overdue	Overdue 90+ days
Groups	2,838	34	0	1	33	20	\$9,396 <mark>,29</mark> 9	13	0	0
Maritime	1,114	222	0	0	222	130	\$553,600	82	10	3
Aircrew	2,076	167	0	10	157	47	\$434,050	106	4	0
All other arrivals	28,366	21,927	2,856	9,484	9,587	4,325	\$16,212,715	4,047	1,215	133
Total	34,394	22 <mark>,3</mark> 50	2,856	9,495	9,999	4,522	\$26,596,664	4,248	1,229	136

Note: The 'Overdue 90+ days' column represents the number from the 'Overdue' column that have been outstanding for 90 days or more.

4.6.2 Waivers

The table below breaks down the waiver application information between 11 Aug 2020 and 30 Mar 2021. The numbers below relate to all waiver applications; waivers can be applied for before, during and after an individual has stayed in managed isolation. The 'waivers approved' in the table above are a subset of the total waiver applications which have been approved; they relate to people who have left managed isolation and would otherwise have now been due to receive an invoice.

	Waiver applications received	In progress	Total completed	Total financial hardship applications	Total special circumstances applications	Approved waiver applications		Declined waiver applications	
						Financial Hardship	Special Circumstances	Financial Hardship	Special Circumstances
Total	4,896	108	4,788	589	4,199	74	3,696	515	503

4.7 Emergency Allocation Applications

- 3,149 applications have been processed since 30 Oct 2020.
- 53 applications were received in the week ending 28 Mar 2021 and 64 applications were processed.
- From the applications processed in the week ending 28 Mar 2021, 72% of the applications were approved.

Emergency Allocation Applications	Weekly Totals	Year to Date Totals 30 Oct 2020 to 28 Mar 2021
Approved	46	1,727
Declined	18	1,422
Applications processed*	64	3,149

*This number does not reflect applications declined at triage stage, rather incomplete applications, or applications not submitted within 14 days of intended departure.

Total Rooms Approved	48
Rooms Allocated in MIAS	38
Cancelled by the applicant	4
Awaiting flight details or MIAS registrations from the applicants to complete the room allocation process	6

		-	-
UE2	п	11	ᇿ

Approvals by Category

• The below chart represents the weekly breakdown of approvals by different categories within the emergency allocation process from 14 Dec 2020 to 28 Mar 2021.

Chart 1: 65% of Applications were approved under 2e and 1a

Chart2: Category 2e and 1a continue to be the most prevalent for applications and approvals.

DECTRICTED

4.8 Resolutions Update

• Data from the Complaints and Feedback Customer Management System for the week 23 Mar to 29 Mar 2021 is as follows:

Week 23 Mar 2021 – 29 Mar 2021	Received	Awaiting more information	Processing	Unassigned	Resolved
Complaints	90	16	7	3	101
Improvements	2	0	0	0	2
Compliments	1	0	0	0	1
Total	93	16	7	3	104

- Average number of complaints received each week since the start of MIQ is 114. For the last 4 weeks the average is 135 per week.
- This week we have received 90 new complaints and have resolved 101 complaints. 34% (31 out of 90) of these complaints were regarding MIQ facilities with MIAS/vouchers/special allocations at a record low of 14% (13 out of 90).

5. Ministry of Foreign Affairs and Trade

5.1 Top Items to Note

5.1.1 Vaccines

The European Council has endorsed the expansion of the EU's "Transparency and Authorisation Mechanism", which gives Member States authority to restrict vaccine exports on the basis of importing countries' vaccine access, vaccination coverage and epidemiological situation. This sets a worrying precedent for unilateral assessment of pandemic impacts as "justification" for export restrictions. **S6**(a)

, Pfizer exports to New Zealand could also be affected. Officials are in regular contact with Pfizer to understand whether the measure will impact supply of the vaccine from Belgium. In s6(a)

6. Border Executive Board Report

6.1 Key Issues Being Considered by the Executive Board

6.1.1 Border Executive Board meeting

The Border Executive Board is scheduled to meet on 1 April 2021.

6.1.2 Border Workforce

- Vaccination of border workers and their household contacts, including staff who may be required to supplement those currently working at the border (for example, should international flights increase following any commencement of quarantine-free travel)
- Addressing the unvaccinated border workers through the 'educate, expect, support' approach
- Improving the accuracy of data associated with vaccination numbers (challenges associated with this include limitations of the technology solutions, privacy legislation, incorrect and incomplete information provided by employers which resulted in individuals being unable to be matched with their National Health Indicator (NHI), inaccurate or omitted employer details and the nature of the evolving, rotating workforce who undertake roles at the border or in an MIQ)
- Exploring redeployment and other options for those who are unable or unwilling to be vaccinated
- Preparing advice on stronger regulatory levers to support the COVID-19 vaccine rollout to border workers

6.1.3 Quarantine-Free Travel

- Quarantine-free travel preparations
 - Airports and airlines readiness
 - Border agencies worker readiness

6.1.4 Travel Health Pass Work Programme – Update

- The Ministry of Transport, in conjunction with cross agency partners, has provided you with a short paper on the Travel Health Pass Work Programme (the Programme) which describes:
 - what the Programme is
 - the work underway including our engagements internationally; and
 - an indicative timeline for more substantive advice
- The Ministry intends to provide a more detailed overview of the Programme ahead of the inaugural meeting of the COVID-19 Ministerial Group on 15 April 2021.

6.1.5 Assurance

Following on from the Review of COVID-19 Aviation Border Measures (Tranche One) undertaken by Venter Consulting in August last year, the Border Executive Board has commissioned a separate review so that it has assurance that the required border measures are in place at our sea borders to ensure all people arriving in New Zealand are appropriately managed, minimising opportunities for the spread of COVID-19.

- The COVID-19 Maritime Border Measures (Tranche Two) will be led by Wendy Venter of Venter Consulting
- The scope of the review includes all activities relating to people arriving in New Zealand by sea: passengers and crew on commercial and private vessels. It includes any measures that

RESTRICTED

are in place throughout the journey to New Zealand, including transit and arrival processing in New Zealand

• The final report is expected to be presented to the Border Executive Board by 30 June 2021

7. New Zealand Customs Service Weekly Report

CUSTOMS SERVICE

7.1 Items to Note/Updates

7.1.1 Pre-Departure Testing
