The Blueprint comes alive !

Release Date: 16 August 2012

Experience the blueprint for Christchurch in virtual 3D!

The Liquid Galaxy unit developed by the Hit Lab team at the University of Canterbury, is a state of the art, interactive display that lets you experience an immersive fly over of our future city.

The unit consists of six 50" plasma screens and is powered by six computers running highly visual data in real time.

Standing in the middle of the unit, you are immersed in the new city.

Experience flights over Christchurch and explore the layout of the new central city.

Your flight will be piloted by a student ambassador from the University of Canterbury.

Where: Christchurch City Council Building Foyer, Worcester Blvd

When: 8.30am – 5pm daily until Friday 24 August.
